PROFESSIONAL EXPERIENCE

Operations Executive
09/2026 – Present

myAlfred.com | Remote | Full-time | Insurance Services, UAE

- Manage insurance data operations by validating policy, documentation, payment, and transaction data for accuracy and completeness.
- Reconcile policy payments, invoices, receipts, commissions, and VAT data, identifying discrepancies and maintaining data integrity.
- Maintain operational datasets, booking trackers, and transaction records to ensure accurate and timely processing.
- Develop operational reports and dashboards using Power BI and internal data to monitor bookings, payments, exceptions, and workflow KPIs.
- Analyze operational data to identify inconsistencies, trends, and process improvement opportunities.
- Collaborate with Operations and Placement teams to resolve data issues and improve reporting workflows, operational controls, and process efficiency.

Data Management Executive
03/2024 – 09/2026

myAlfred.com | Remote | Full-time | Insurance Services, UAE

- Managed and validated insurance policy, premium, benefits, and master data across multiple insurance products and carrier sources.
- Standardized and mapped vehicle and policy data with internal databases, improving data quality, search accuracy, and quotation matching.
- Prepared AML and regulatory reports by extracting, transforming, validating, and formatting policy data for insurer submissions.
- Used SQL and Excel to improve data workflows, reporting accuracy, and consistency across operational datasets.
- Developed and maintained operational dashboards and reports to monitor policy data quality, coverage, and compliance, supporting decision-making and operational efficiency.
- Supported Business Analysts, Compliance teams, and insurer stakeholders with accurate data, reporting, and data-quality analysis.

Data Analyst
12/2022 – 02/2026

PackageX, Inc. | Islamabad, Pakistan (US-based SaaS Company)

- Built weekly-to-annual usage reports from PostgreSQL/MySQL product databases and HubSpot data in BigQuery, using Excel to analyze customer behavior, product trends, and performance.
- Built billing projection reports using SQL and Excel, improving forecast accuracy by 30% and reducing billing discrepancies by 18%.
- Developed churn predictors and renewal dashboards using contract expiry, usage declines, and behavioral signals, improving renewals by 15% and retention by 25%.
- Built 20+ Tableau and Power BI dashboards for Product, Sales, Finance, and Executive teams, increasing stakeholder adoption by 50%.
- Conducted CRM audits to identify and fill missing values, improving data accuracy and maintaining a single source of truth.

- Analyzed product usage, feature adoption, and engagement trends across 1,000+ customers, supporting product roadmap decisions.

KEY PROJECTS

Insurance Portfolio Intelligence & Customer Lifecycle Analytics View Project ↗
Built an end-to-end insurance analytics platform using **Python, Pandas, and NumPy** to generate and validate synthetic customer, policy, claims, leads, renewals, interactions, and payment data. Used **BigQuery and SQL** for analytical views and **Power BI** for semantic modeling and executive insights across portfolio performance, risk, retention, sales funnel, and collections.

Healthcare Analytics Dashboard View Project ↗
Designed an interactive healthcare dashboard using **Tableau** for visualization, **SQL and Excel** for data preparation and analysis, and **statistical analysis** to identify trends in patient demographics, visits, and staff performance, supporting healthcare planning and resource allocation.

Car Price Analysis Dashboard View Project ↗
Built a dynamic pricing dashboard using **Tableau** for interactive visualizations and **SQL** for data extraction and analysis, applying **statistical analysis and data modeling** to identify car pricing trends across fuel type, transmission, mileage, and brand.

EDUCATION

Bachelor of Science in Computer Science 08/2017 – 10/2023
Virtual University of Pakistan

TECHNICAL SKILLS

Analytics & BI	SQL, Python, Power BI (DAX), Tableau, Looker (Data Studio), Excel
Data Engineering	BigQuery, PostgreSQL, MySQL, ETL, Data Modeling, Data Warehousing
Data Quality & Operations	Data Cleaning, Data Validation, Data Reconciliation, Statistical Analysis
Platforms & Tools	GCP, HubSpot, Salesforce, Google Analytics, GitHub
